

The Unicorn Protocol

Figure 1 shows the unicorn protocol, which for now serves as the documentation of the Annex language. Step 1 is just as fictional as Step 2. We can refer to whole groups of steps as well (9).

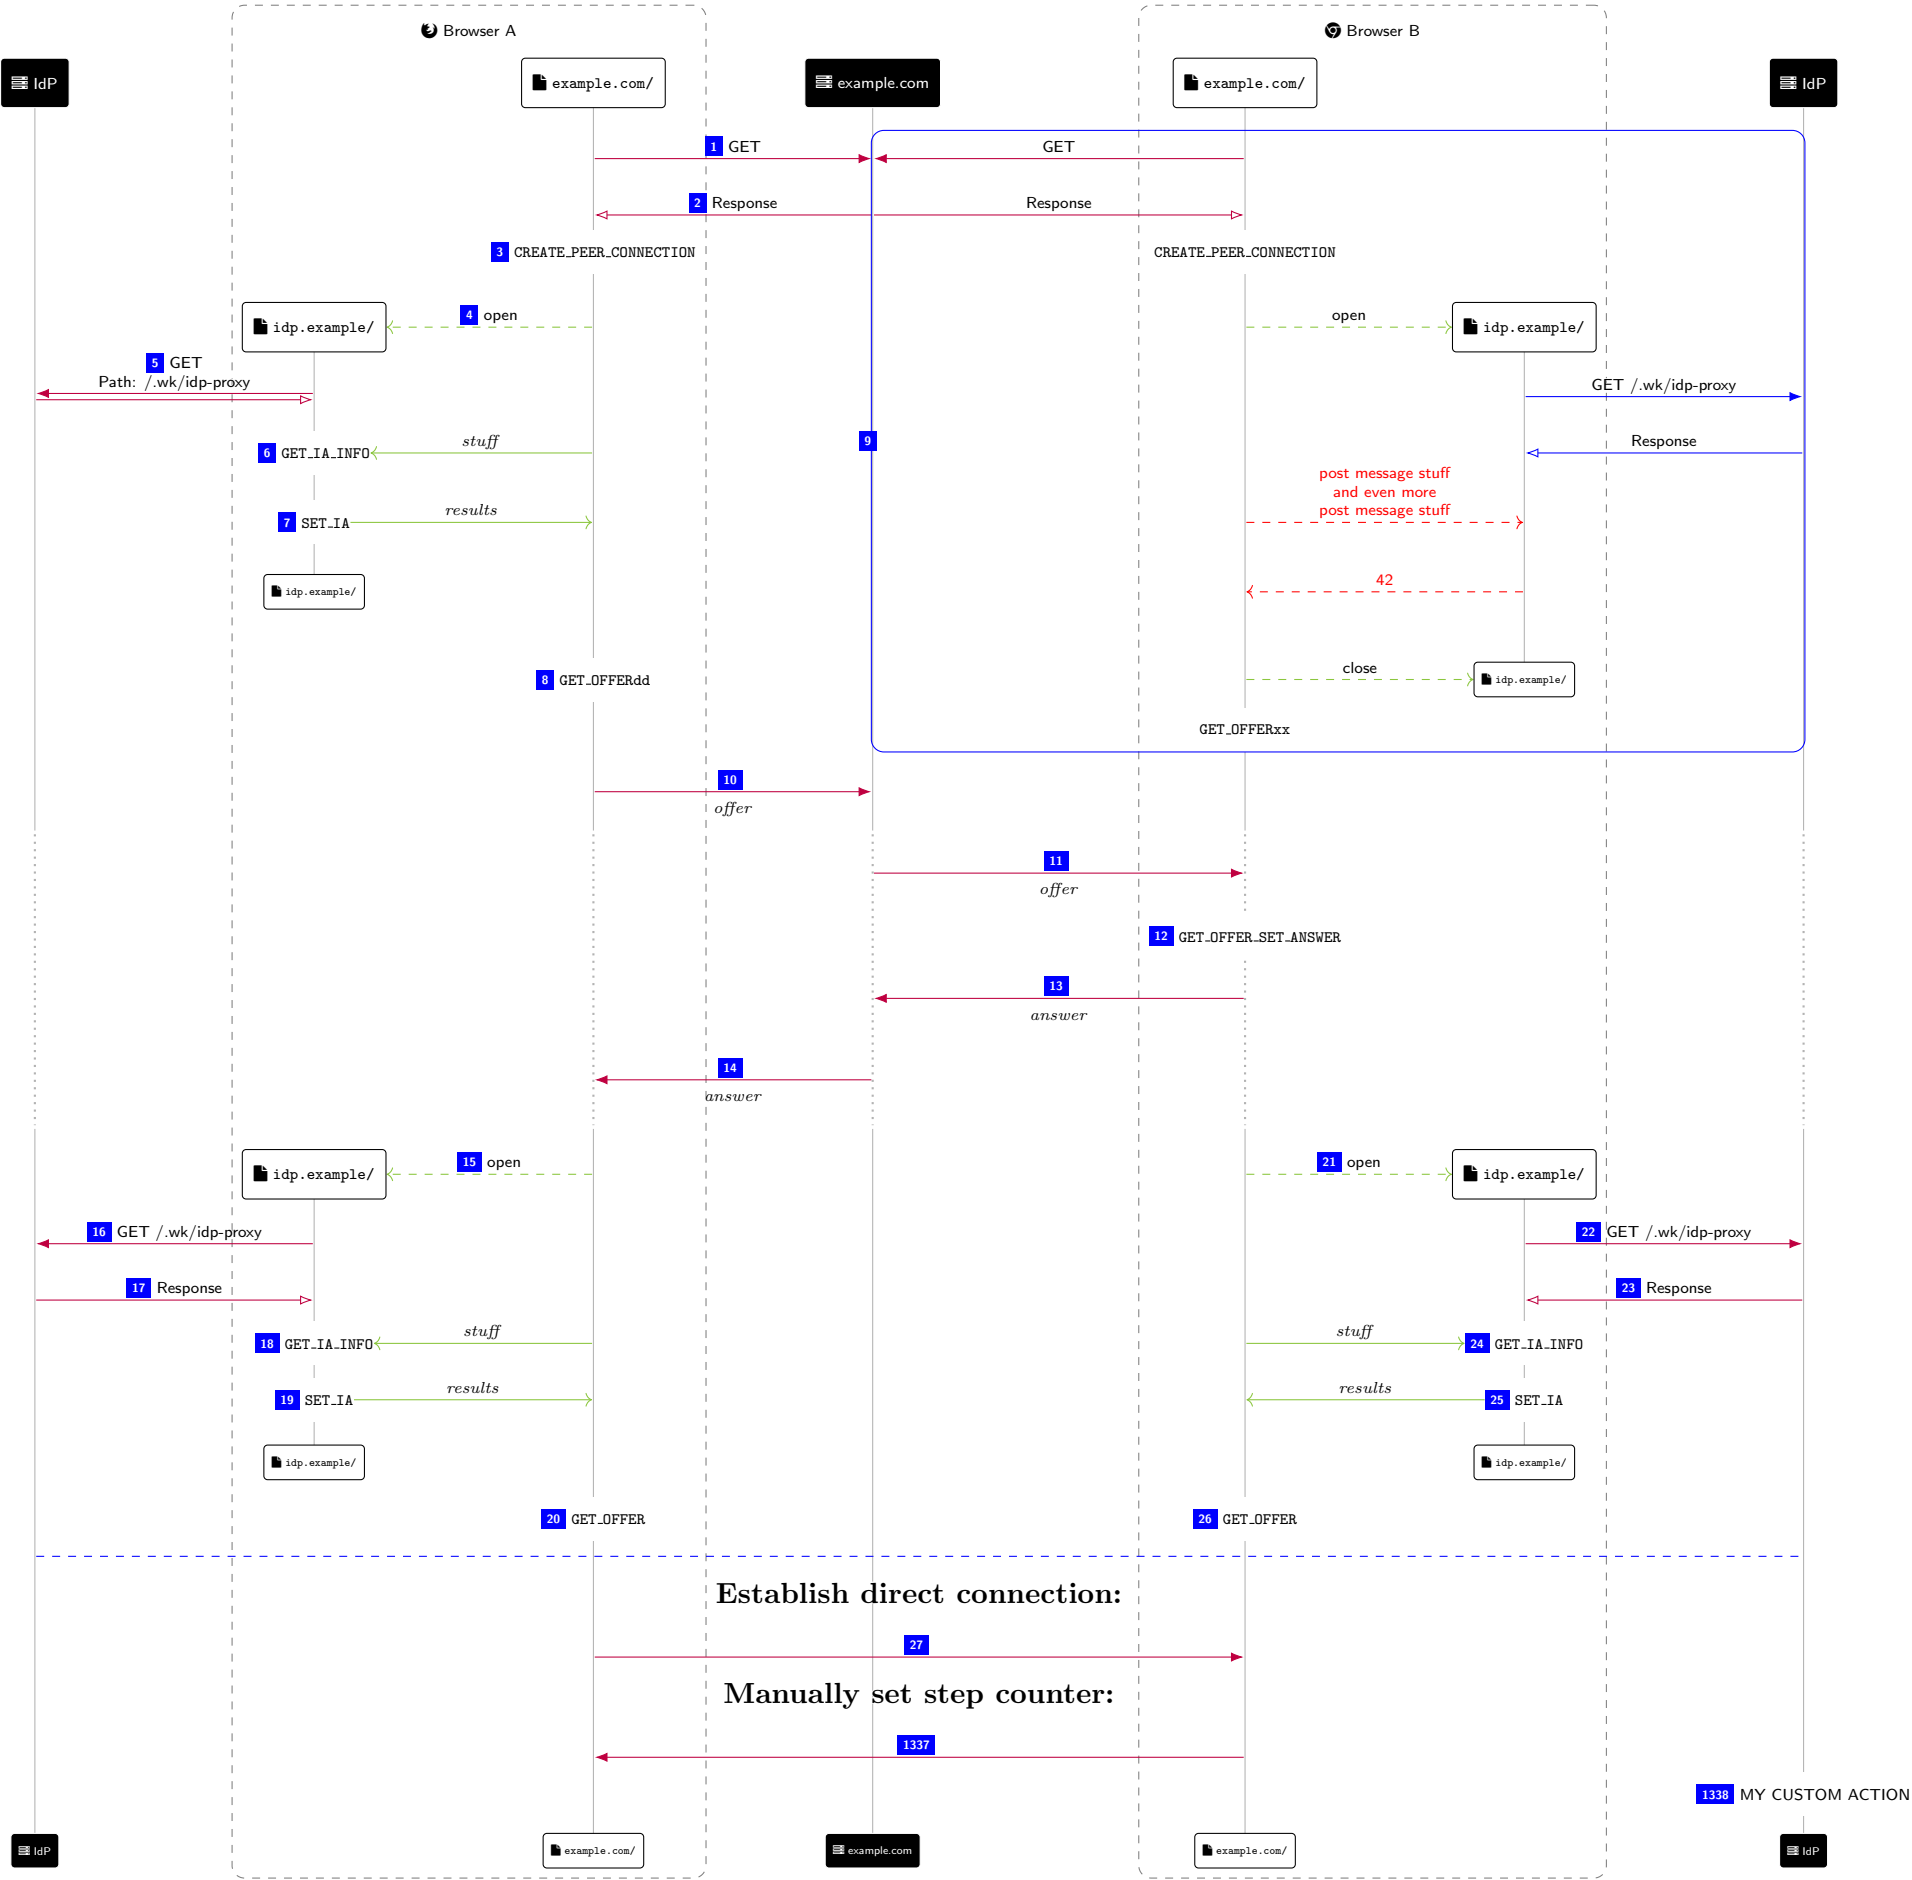

Figure 1: The Unicorn protocol, showing off some features of Annex. The protocol flow, all names, messages, and URLs portrayed in this chart are fictitious. No identification with actual protocols (in production or deprecated), deployments, and products is intended or should be inferred. No unicorns were harmed in the making of this protocol diagram.
